Adult congenital heart care

Past childhood treatment may matter to your current team.

Other heart conditions and life stages

Questions for an individual conversation with your care team.

Past childhood treatment may matter to your current team. These questions can help you ask for an individual plan. Answers depend on your situation and the people responsible for your care.

Questions to take to my team

☐ Should an adult congenital heart specialist be involved in my care?

☐ Which past operation records should I bring, and what lifelong follow-up do I need?

For discussion and personal reference. Your care team's individual instructions take priority. For an emergency, contact your local emergency service; do not wait for a community reply.
